

# **MSPM0 amplifier module introduction**

— MSPM0 peripheral training series

Presented by Eason Zhou

# MCU level overview

## —MSPM0Lxx series

### MSPM0L13x3/4/5/6

**CPU**  
**ARM Cortex-M0+**  
**32 MHz**

NVIC / 3-ch DMA

**On-chip Memory**

8, 16, 32 or 64 kB flash

2 or 4 kB SRAM

**Data Integrity & Security**

CRC accelerator (16 and 32 bit)

**Programming & Debug**

ARM SWD interface

ROM UART & I2C BSL

Leaded packages: SOT-16, VSSOP-20/28

No-lead packages: WQFN-16, VQFN-24/32

**Power & Clocking**

POR / BOR / SVS

Internal LF 32kHz (5%)

Internal HF 4-32MHz (1%)

**Communication**

UART w/ LIN (1)

UART (1)

SPI (1)

I2C (2) w/ FastMode+

**IO**

Up to 28 GPIO

Up to 2 low Ib OPA inputs

1.62 - 3.6V  
-40 to 125 C

**Precision Analog**

12-bit SAR ADC 1Msps (1)

ULP/HS Comparator (1)

8-bit reference DAC (1)

Zero-drift chopper op-amps (2)

General purpose amp (1)

Internal ADC reference (2.5%)

Temperature sensor

**Timers**

General purpose 16-bit 2 CC (4)

Windowed watchdog

**Amplifiers**

Zero-drift chopper op-amps (OPA)

General purpose amp (GPAMP)

32 MHz MCU with up to 64kB flash, 32 pins, 12-bit ADC,  
dual zero-drift OPA/PGA, COMP

# MSPM0 OPA overview

## Key Features

### High flexibility:

- Configurable amplifier modes
- Rich selection of external/internal input options
- Output to ADC, OPA and comparator
- Programmable gain amplifier (PGA) up to 32x
- Burnout current source to detect sensor status

### High performance:

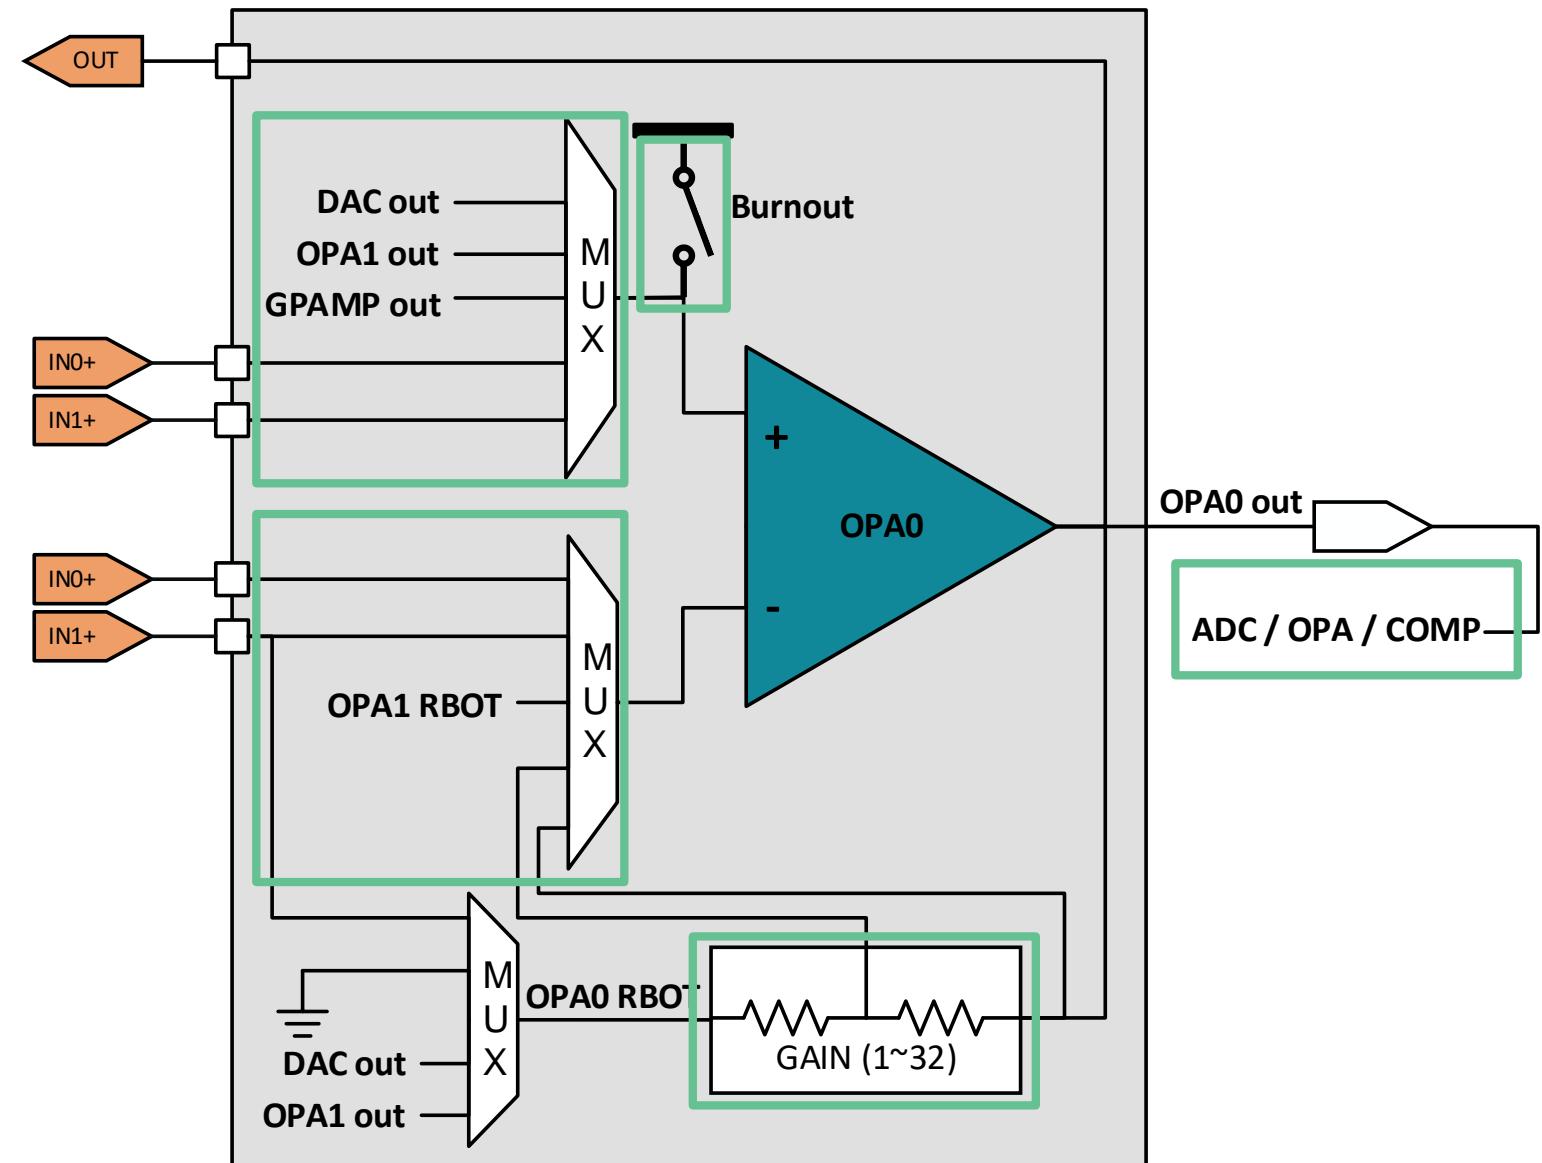

- Chopper stabilization to reduce offset, drift, and 1/f noise, 0.1 mV V<sub>os</sub>, 1- $\mu$ V/°C V<sub>os</sub> drift with chopping
- Rail-to-rail input & output
- 6MHz GBW
- Lower to 100 $\mu$ A quiescent current

## Some Use Cases

- Use internal OPAs to replace external OPAs
- Switch between IOs to use one OPA to realize two OPA functions
- Dynamic change OPA settings to calibrate voltage offset and internal Gain with ADC and DAC

## Differences between G and L MCUs

- MSPM0L134x has dedicated IN- pin to reach 10pA bias current for TIA(Transimpedance amplifier) application

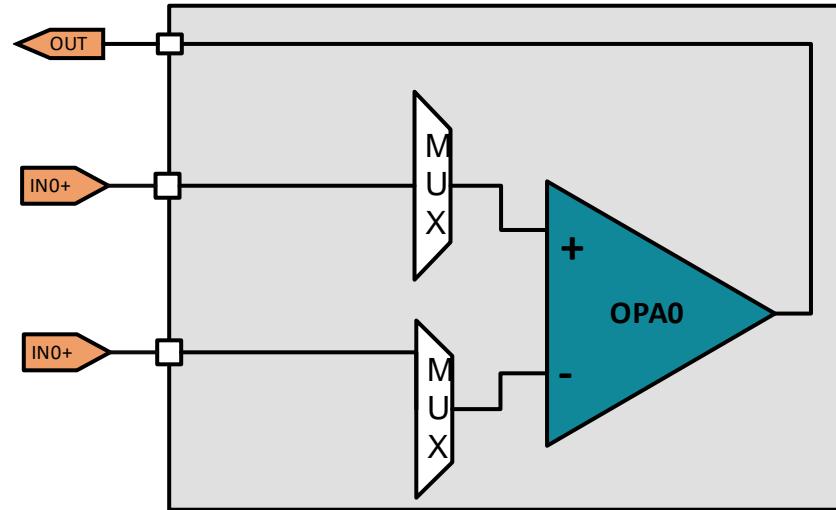

# OPA key parameters summary

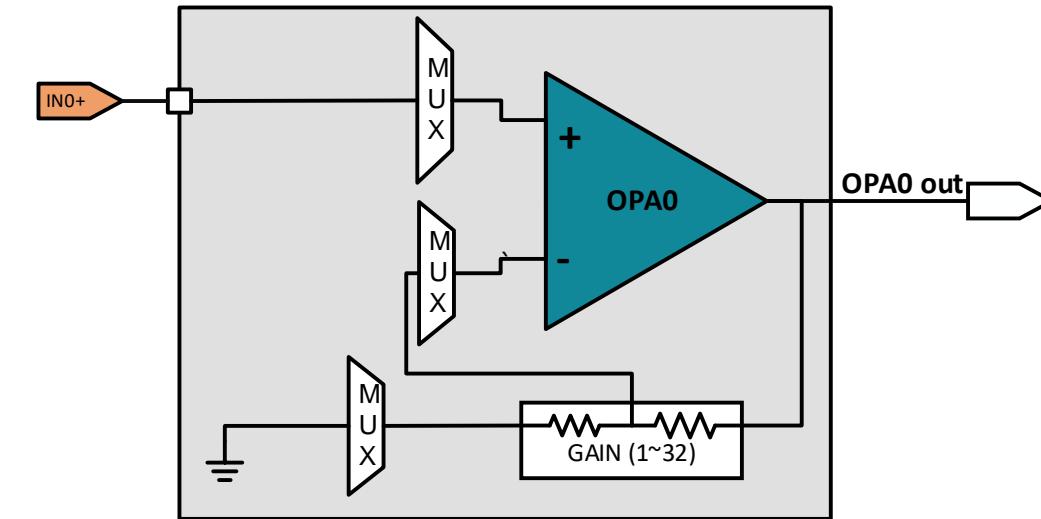

Parameters	Value without chopper	Value with chopper	Unit
Rail-to-rail	60 ~ VDD-60		mV
GBW (typ)	6	~0.125/Gain	MHz
Slew rate (typ)		4	V/ $\mu$ s
Vos (25°C max)	$\pm 2$	$\pm 0.3$	mV
Offset drift (typ)	$\pm 5.2$	$\pm 0.5$	$\mu$ V/°C
Vn at 1 kHz (typ)	240	NA	nV/ $\sqrt{\text{Hz}}$
Input bias current (25°C typ)	150 (Shared OPA pin) 10(Dedicated OPA pin)	1000 (Shared OPA pin) 800(Dedicated OPA pin)	pA
CMRR (typ)	89	95	dB
Iout (typ)		1	mA
Iq per channel(typ)		0.1	mA
Internal Gain		0~32	V/V

# OPA flexibility

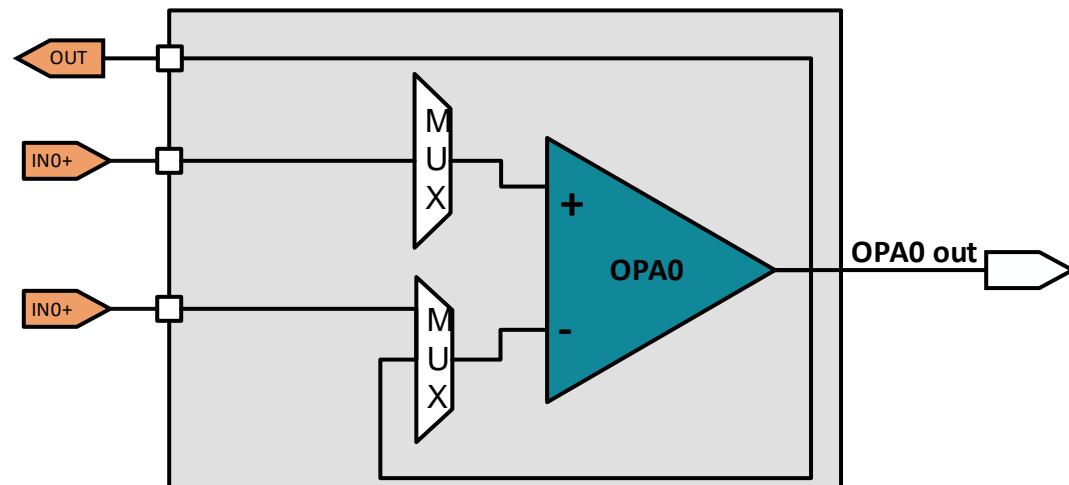

General-Purpose Mode:

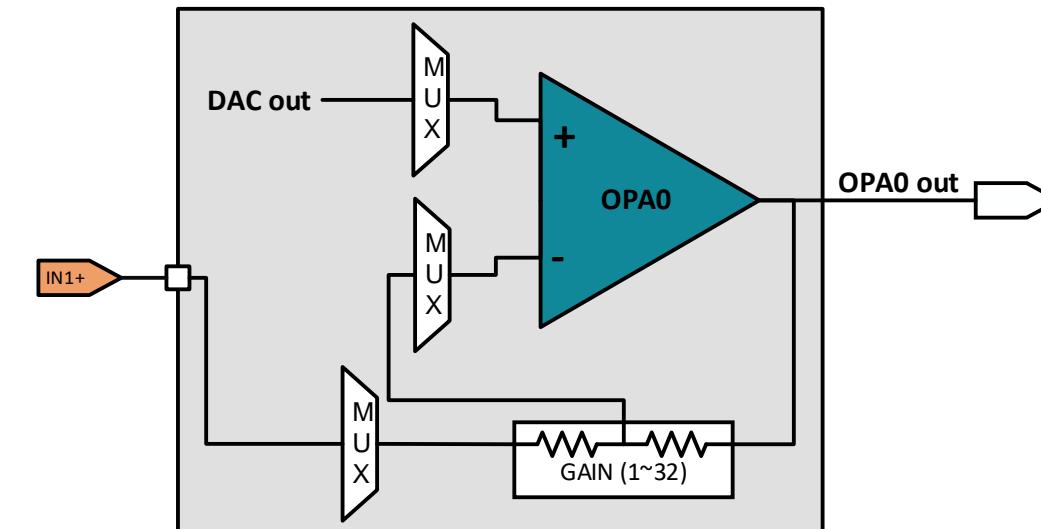

Non-inverting PGA Mode:

Buffer Mode:

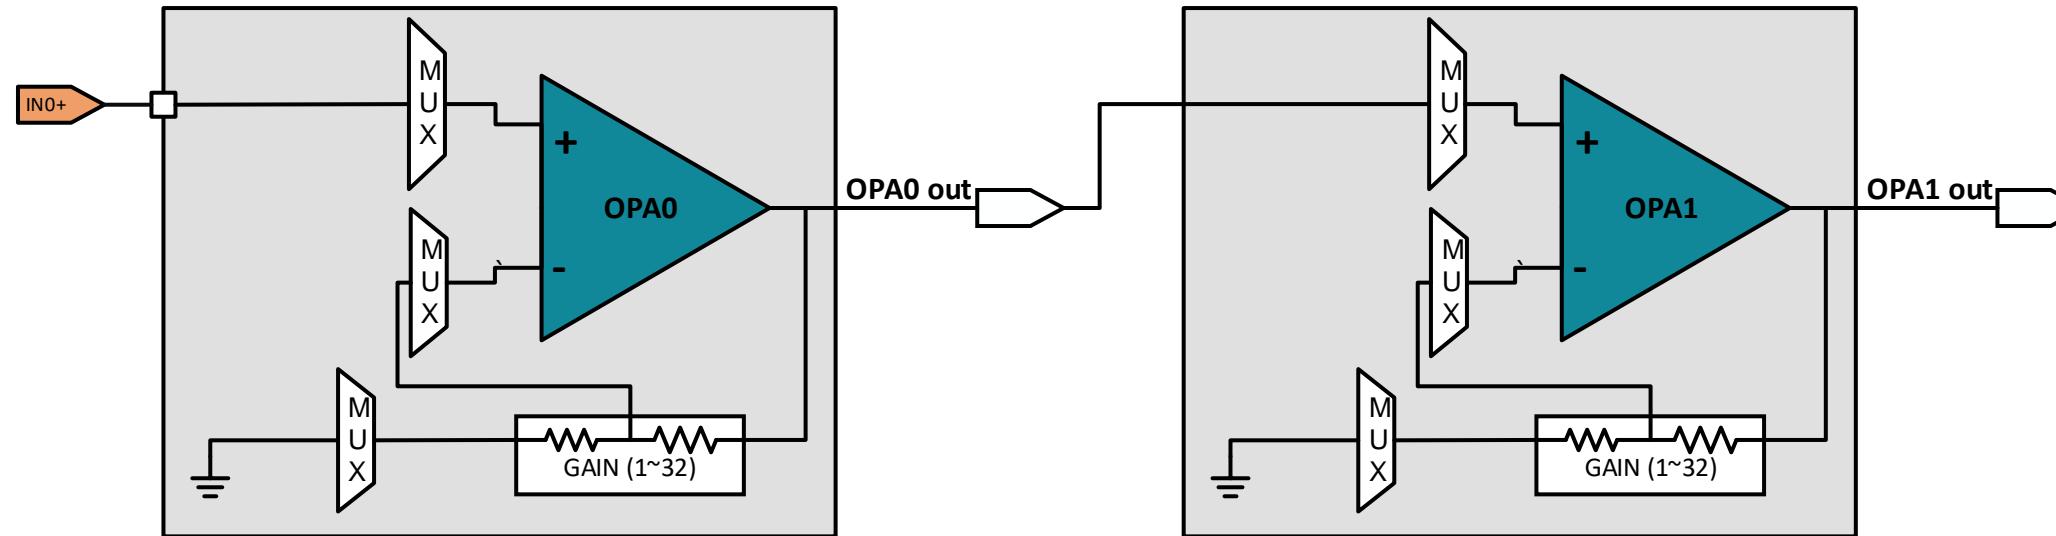

Inverting PGA Mode:

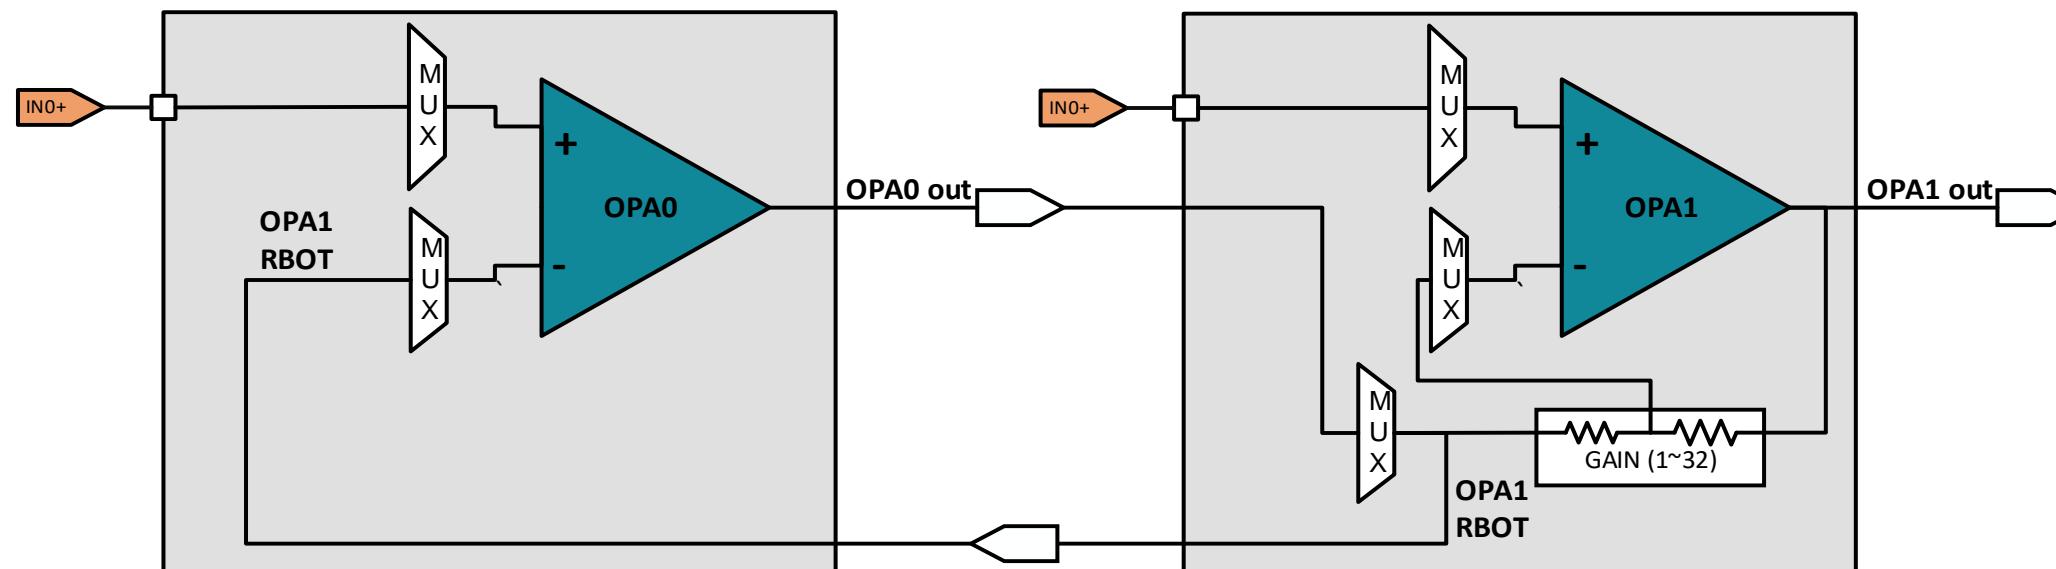

# OPA flexibility

## Cascade Amplifier Mode:

## Differential Amplifier Mode:

# MSPM0 GPAMP overview

## Key Features

### Flexibility:

- Output to ADC and OPA
- Programmable internal unity gain feedback loop

### Performance:

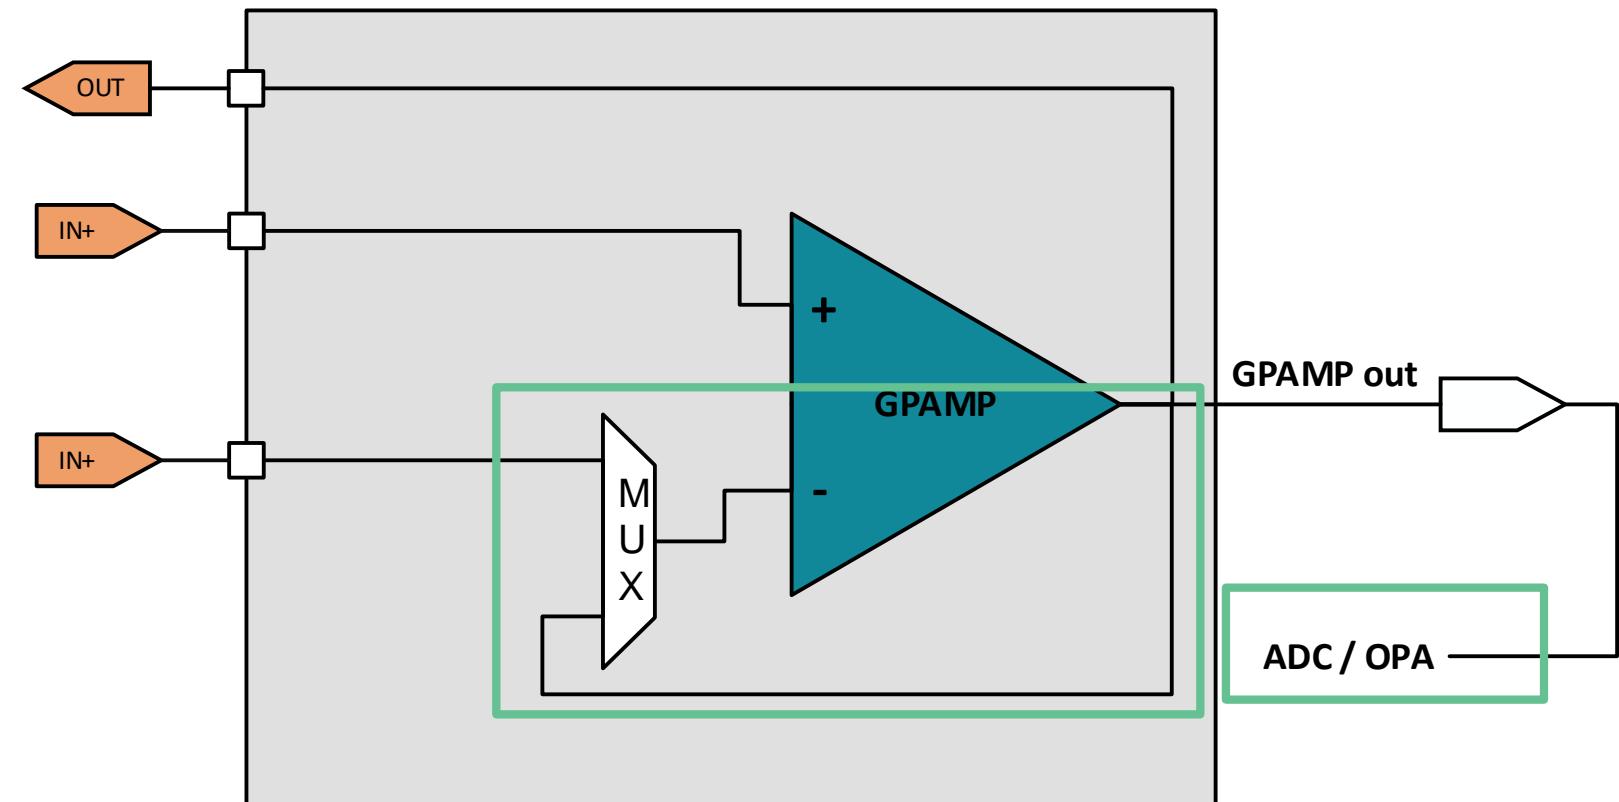

- Chopper stabilization to reduce offset, drift, and 1/f noise
- Rail-to-rail input & output
- 350KHz GBW

## Some Use Cases

- General purpose amplifier
- Signal buffer

## OPA vs GPAMP

	Parameter	OPA	GPAMP
Flexibility	Input MUX	External/ADC/DAC /REF/OPA/GPAMP	External /GPAMP
	PGA	1~32	1
	burnout current source	Support	NA
Performance	GBW	6MHz	350KHz
	Quiescent current	100uA	100uA
	Vos with chopper	<0.3mV	<0.39mV
	Ios no chopper	150pA	16pA

## Sysconfig Entrance for OPA Setting

Step1: The screenshot shows the Sysconfig software interface. On the left, there is a tree view of peripheral categories: ANALOG (5), COMMUNICATIONS (5), and TIMERS (5). Under ANALOG, 'OPA' is selected, highlighted with a green checkmark. To the right, a configuration panel for the 'OPA\_0' peripheral is displayed. The 'Name' field is set to 'OPA\_0'. The 'Selected Peripheral' dropdown also shows 'OPA0'. Below the configuration panel, there are sections for 'Quick Profiles', 'OPA Pre-Set Configuration', and various configuration parameters like 'Non-Inverting Channel (PSEL)', 'Inverting Channel (NSEL)', 'Input MUX (MSEL)', and 'Gain'. A blue box highlights the '+ ADD' button under the peripheral list, labeled 'Step2:'.
